

READING THIS WORKING RECONSTRUCTION

One sheet. Functional wiring is proposed: this is not a verified production circuit.

149 retained catalog entries; unsupported TP entry removed after photo audit.

H1* = Inferred Inter-black net. Other net names do not imply measurement.

? on a part value or pin function means an estimate or candidate identity.

Library pin numbers are mapped to photo pads in evidence/pin_crosswalk.json.

U2 and U3 use multiple symbol units on this same sheet. Including supply units.

28 original local photo fragments retained: Q11-R43.2 withdrawn by user.

PIC pads have local nets; some onward routes remains unresolved.

DNP = unpopulated. An open pin means unresolved, not a certified no-connect.

PIR daughterboard internals are not yet traced: J3 represents the interface.

No capacitor value or rail voltage in this drawing was electrically measured.

See docs/RECONSTRUCTION.pdf for evidence, alternatives, and calculations.
