01 POWER / INPUT FILTER

U1: S-1200B45 candidate; VDD measured 4.5 V.

Candidate U1 pin 4 is internally open; external option pads remain connected.

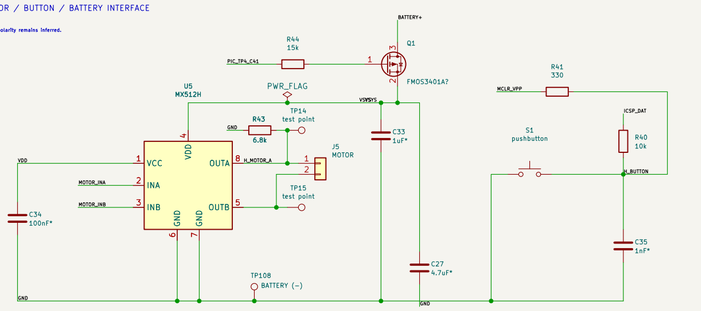

02 PIC CONTROLLER / CLOCK / ICSP

R3/R4/C28 sensing function remains unverified.

03 MOTOR / BUTTON / BATTERY INTERFACE

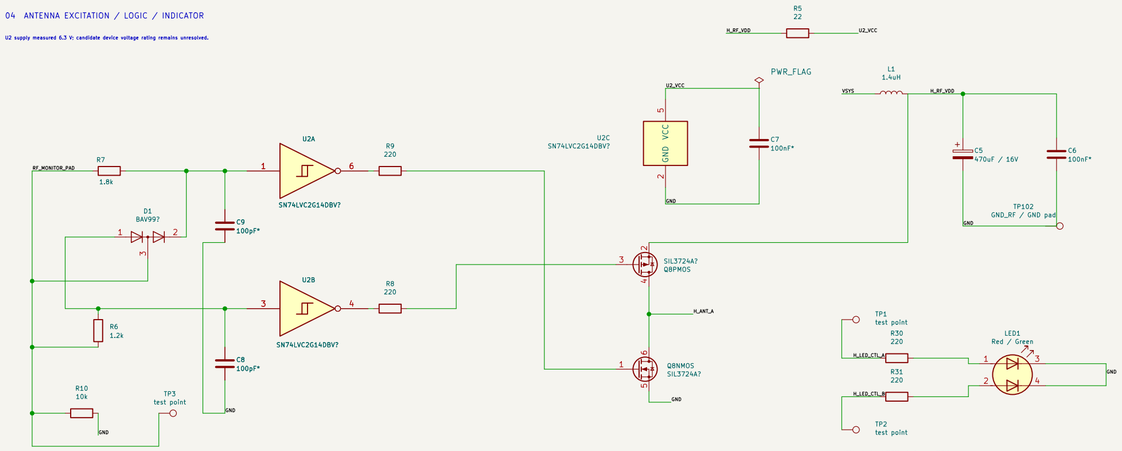

Motor output polarity remains inferred.

Q1 identity and powered control behavior remain unverified.

04 ANTENNA EXCITATION / LOGIC / INDICATOR

U2 supply measured 6.3 V; candidate device voltage rating remains unresolved.

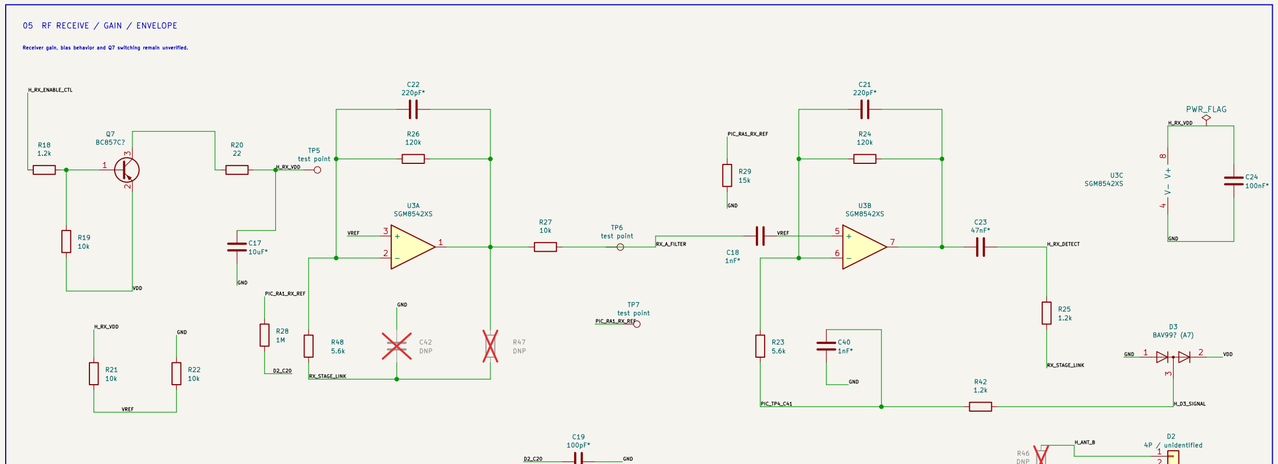

D1 identity and timing function remain unverified.

LED1: pin 1 red (R30); pin 2 green (R31).

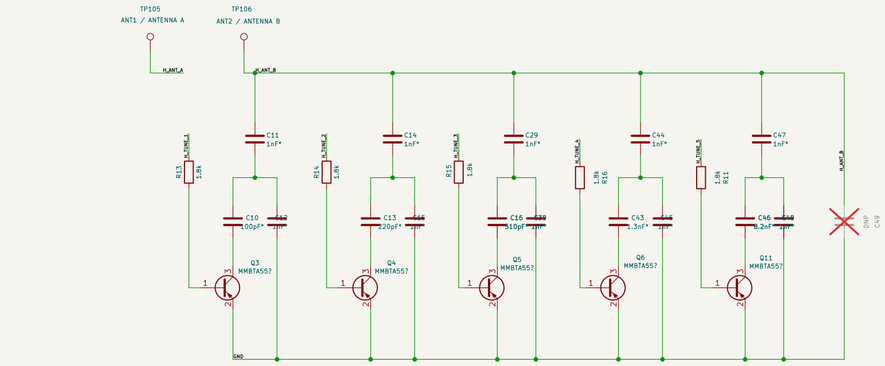

05 RF RECEIVE / GAIN / ENVELOPE

Receiver gain, bias behavior and Q7 switching remain unverified.

C42 / R47 / R46 are unpopulated options.

06 SWITCHED ANTENNA CAPACITANCE

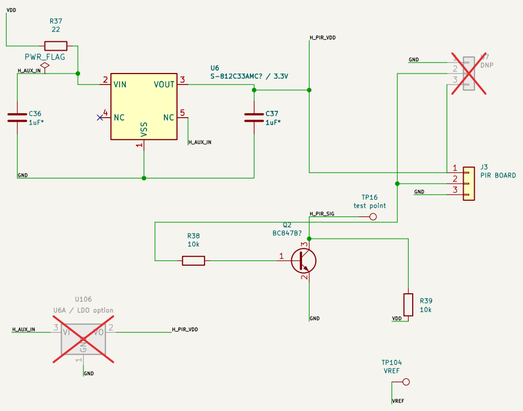

Tuning values assume 500 uH and 134.2 kHz; switching weights/order remain unverified.

Q3 diode readings dispute the PNP pinout. Q3/Q4/Q5/Q6/Q11 identities remain unverified.

07 PIR / AUXILIARY RAIL

U6: S-812C33 candidate; PIR supply measured 3.3 V.

U6A / U106: DNP regulator option. Symbol and ERC conflict retained intentionally.

RECONSTRUCTION NOTES

Reviewed drawing baseline; not a fabrication-qualified design.

Net labels identify connections; names alone do not establish circuit function.

* = estimated capacitor value; ? = unverified device identity or pin role.

Physical pad mapping: evidence/pin_crosswalk.json. Open items: docs/OPEN_ITEMS.md.

TP11 and TP17 are valid endpoints; possible hidden branches remain unproved.

DNP = not fitted. An unresolved route is not an intentional no-connect.

Main board only. PIR internals, antenna assembly, motor and firmware are outside this drawing.

Capacitor estimates and ratings: docs/CAPACITOR_VALUE_REVIEW.html.

v0.9.49 | KiCad 10.0.5 | 2026-10-15

44 starred capacitor estimates; device functions remain qualified.

Owner layout | reviewed reconstruction baseline
