

H21: likely 5-1200045 LDO. Nominal 4.5 V is a candidate, not a measured rail

Optional R1/R2/C3/C4 network: empty footprints; free ends unresolved.

H32: programming and decoupling inferred. Unassigned GPIOs stay open; PPS prevents a unique functional pin guess.

HD4: HXS12H typical supply/output topology. Meter A/B and MCU control assignments remain hypotheses.

#05: NPN interface candidate; bias destination unresolved.

RC deance inferred

H37: U2 matches SN74VLC2514 (C14B, 6 pins). Q8 probably contains two switching devices; exact type unresolved

H37: U2 matches SN74VLC2514 (C14B, 6 pins). Q8 probably contains two switching devices; exact type unresolved

Q8 T2/T1/T02 power assignments open.

H10-H12: working topology around photographed 120k feedback resistors. Filters, bias, and interstage routes inferred

H13: 2H devices are probably PNP BJTs (MMBT455 family; PBSS5140T is an alternative). Capacitor values unknown.

H13: 2H devices are probably PNP BJTs (MMBT455 family; PBSS5140T is an alternative). Capacitor values unknown.

$C_{eff} = C_{top} * (C_{front} + C_{rear}) / (C_{top} + C_{front} + C_{rear})$. Equal values give 2C/3 per enabled branch.

All-parallel and all-series banks remain alternatives. Emitter rail / collector orientation is provisional.

H14=H15; J3 pin order and U6 LBO topology are low-confidence.

H14=H15; J3 pin order and U6 LBO topology are low-confidence.

No invented ties or untraced spare pads; original reference aliases retained.

No invented ties or untraced spare pads; original reference aliases retained.

No invented ties or untraced spare pads; original reference aliases retained.

One sheet. Functional wiring is proposed; this is not a verified protection circuit.

One sheet. Functional wiring is proposed; this is not a verified protection circuit.

150 original mail-board catalog entries, including BNP footprints and named pads.

H₀* = Inferred inter-block net. Other set names do not imply measurement.

? an a part value or sin function means an estimate or candidate identity

Original photographed and names remain on ambulance backpacks (L/R/S)

112 and 113 use multiple symbol units on this same sheet. Included auto.

29 critical local virtual fragments are retained; added connections are highlighted

[illegible]
